3	Internet	100Mbps Internet (fixed IP) requiredt
4	Spatial requirements	60 cm of space required to the right, left, and rear of the machine
		1 m recommended for maintenance

Example business scenario

Case 1 An interview with an employee at “H” company

We were looking for a coffee dispenser for us at the office. That’s when we discovered DR. Presso, an invigorating and exciting solution for our staff members. We chose DR. Presso over an ordinary coffee machine. **About 80-100 cups are made daily on average, and a satisfaction survey conducted after a month of use** revealed many positive responses.

Summary of satisfaction survey results

Coffee flavor	Positive responses citing latte-type drinks with very soft milk foam, coffee beans with abundant flavor, and little acidity in the coffee
DR. Presso design	A clean, beautiful aesthetic reminiscent of a cafe
Menu composition	Positive responses for featuring non-coffee drinks and ades in addition to the basic coffee types

Case 2 Interview with individual business owner (anonymous)

I learned of DR. Presso when I was searching for a way to generate rent revenue with a small unused space in my building. I was able to generate this revenue simply by providing the space, nothing more. The space was too small for a full-fledged shop, but DR. Presso allowed me to create revenue with it.
